

NovaCart — Shipping Policy

Standard Delivery

Standard delivery is normally 3–7 business days after dispatch for serviceable locations in India. Delivery estimates are not guarantees and may change because of weather, carrier delays, remote-area routing, or peak-season volume.

Express Delivery

Express delivery is available for selected products and PIN codes. Where offered, the checkout page displays the applicable estimated delivery date before payment.

Free Shipping

Orders above ₹999 may qualify for free standard shipping, subject to product-level exclusions and serviceability.

Tracking

Once an order is dispatched, customers receive a tracking reference. Tracking events may take several hours to appear after the carrier receives the parcel.

Address Changes

Address changes are generally possible only before the order is packed. Once an order has entered carrier handoff, the customer should contact support rather than assuming an address change is possible.
